Seth Weintraub

(925) 960-3973 | weintraub.s@northeastern.edu | linkedin.com/in/seweintraub | github.com/Setloth | Boston, MA

Education

Northeastern University — Boston, MA

B.S. in Computer Science and Music, Minor in Music Recording — *Expected Aug. 2027*

- **Coursework:** Software Engineering, Algorithms & Data, Object-Oriented Design, Database Design, Cybersecurity, Game Programming, Digital Audio Signal Processing, Discrete Structures, Computer Music Fundamentals

Experience

Full-Stack Web Developer (Freelance) — Jan. 2026 – Present

Music Is Healing — *Boston, MA*

- Rebuilt a music collective's web platform end-to-end in a single summer, migrating to a modular **React** frontend and **Node.js/Express** backend with reorganized, optimized routing and page handling
- Redesigned **15+ API endpoints** into a consistent **RESTful** architecture, making the codebase easier to maintain and extend
- Enabled the launch of **3 new projects** on the platform since release, plus recording, hosting, and sharing of podcast, interview, and radio series
- Partnered with the founder to turn a "collective hub" vision into shipped features: musician profiles, event listings, and shared coursework

Code Coach — Sep. 2021 – Jan. 2022

theCoderSchool — *Pleasanton, CA*

- Managed a concurrent roster of ∼**12 students** (elementary–high school), each on an individual weekly schedule, through 1:1 and small-group sessions
- Guided each student through **3+ complete projects** (apps, games, websites, game mods, CLI tools) in **Java, C#, Python, and JavaScript**, using multi-week build cycles with fundamentals reviews as needed
- Onboarded trial and interim students from other coaches, assessed their interests, and designed custom project paths, **converting several into full-time enrolled students**
- Taught with industry tools including Unity, Unreal Engine, Visual Studio, IntelliJ, Replit, and GitHub

Projects

SampleBreakdown | *React, JavaScript, Audio Processing, AI-Assisted Development* — 2026

- Built an interactive React app that pairs songs with their original samples, letting users see, hear, and manipulate samples through a custom **audio playback** engine
- Engineered real-time waveform processing that syncs visuals with audio playback to reduce drift
- Used **AI tools (Claude)** to research audio-handling approaches and plan the playback implementation, accelerating development
- Demoed to listeners with no music background, teaching the basics of sampling and the history of the genre

Lifesteal | *Java, Minecraft Server API, Git, GitHub* — 2022

- Built and sold a server-side Minecraft plugin with **4,000+ copies sold**, running on thousands of servers
- Became the **highest-grossing plugin on the Minehut marketplace**, earning **$1,000+** in revenue
- Grew a **300+ member** user community on Discord and GitHub, turning feedback and issue reports into **10+ bug fixes and quality releases**
- Maintained a version-controlled GitHub repository with documentation, support, and public issue tracking

Audio Antiquing | *Max/MSP, Digital Signal Processing* — 2025

- Designed a Max/MSP audio plugin that replicates the acoustic degradation of vinyl playback
- Researched and implemented mathematical distortion models to achieve an authentic analog sound

Technical Skills

Languages: Java, JavaScript, Python, C, C++, C#, HTML/CSS
Web & Backend: React, Node.js, Express, REST APIs
AI-Assisted Development: Claude, AI-assisted research, debugging & code review
Audio & Game Dev: Max/MSP, JUCE, Digital Signal Processing, Audio Engineering, Unity, Unreal Engine
Tools: Git, GitHub, Visual Studio, IntelliJ, Linux, macOS, Windows
